Summary

New plate to mount an Orbiter extruder rotated 180 degrees on EVA 3 short base with cable trays

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [3dprint](#) [eva3](#) [3dmod](#)

If you have an Eva3 carriage, in a 3D printer frame like a bridge, and not like a cube, you'll always will have problems to run the cables, this new plate will help you to mount an Orbiter extruder rotated 180 degrees, giving you at same time some paths for cables, adding in both sides cable trays
