Summary

This is a holster for ryanrybot's M3 Predator Upload which doesnt hide your prop.

Tags: [prop](#) [holster](#) [effect](#) [mass](#) [gun](#) [masseffect](#) [pistol](#)
[cosplayprop](#)

This is a holster for [ryanrybot's M3 Predator Upload](#) in my own design, claiming no screen accuracy, but with the goal in mind not to hide the prop.

ATTENTION: your prop should be glued properly otherwise the lower sideparts could pop.

Printing

I designed to be printable without supports

Lining

I glued 2mm (rubber-)foam to the contacting parts to get a decent fit between holster and prop, DON'T SKIP IT the fit will be horrible and you paint will scratch.

Mounting

either 3 of the bolt down pads to molle using 3 M6x12 screws and nuts (I marked the holes), use Pracord to do some webbing or come up with an even better idea, I left you plenty 6mm holes.

The picture shown has the mounting offset and freshly drilled holes, but that's changed in this release

Print Settings

Rafts:

Doesn't Matter

Supports:

Doesn't Matter

Notes:

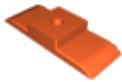

Use common sense for filament material, use ≥ 4 Walls @ 0.4 Nozzle

Category: Costume
