This is a coaster with a basket ball shape to allow you have a drink during the matches of your favorite team without dirtying the table.

It's a simple design with a ball in the middle of the coaster. You have a coaster holder that allows you to put up to 7 coasters here: [Coasters Holder](#)

It's designed to print with a filament color change. If you print it at 0.2mm height you must change color at layer 10. I recommend using white color as the base and black for the top but you can use whatever you want.

You can see me sorting the Sports Coasters here: <https://youtube.com/shorts/xr6Vf0rxgqY?feature=share>

Hope you like it! Any advice, or recommendation is welcome! Happy Printing!

I would be very grateful if you print it and put it on social networks to tag me at [@Frikarte3D](#)
