---

I always clean the Roborock S5+filter after vacuuming.

The filter only can be knocked, so I decided to make a vacuum cleaner adaptor.

This one also fits in a 34.5 mm housing (Daison and others).

If you need a different diameter please send a comment, I will design and post.

Printed in PETG, infill 25%.

Please like and return your comments.

Feel free to donate, thank you.
