Summary

Quick and dirty mount for Hive Mini Hub

[Household](#) > [Other House Equipment](#)

Tags: [hive](#) [heating](#)

I recently got a Hive Mini and wanted to mount the hub under my desk out the way.

I couldn't find anything on here so quickly put something together in Fusion 360

It's a bit of a pain to print - you need supports everywhere set and a pretty well setup printer

Printed fine on my modded Ender 3, I just cut the supports off with a blade as the actual frame is quite thin.

I left the fit quite loose so if you wanted you could put some thin foam pads inbetween the frame and the hub
