This was a predictably easy one, but not without its challenges.

While modeling the main body of this creature wasn't that hard, I ended up using blender's cloth simulation to make the creature's loose skin, which was only difficult because it was new to me. Overall, I loved how the Blood-Starved Beast turned out. Sorry I didn't have much more to say about the model, but this was an easy one and I expected it to be so. Have fun with it!
