### Summary

I have to drill holes for 320mm handles on 12 Ikea maximera / metod 80cm drawers so I made a drilling template

I have to drill 24 holes for 320mm handles on 12 Ikea drawers (80cm wide). So I designed a quick template to hopefully have them straight. Also it was more fun than starting the actual build.

This sets the holes 50mm below the top. Pictures show the second iteration before I improved the hexagons. Because as the wise man said, 'hexagon is bestagon'.

no supports needed, I suggest brim ears to prevent any warping.
