Ford Expedition Phone Stand

- A little stand that holds your phone on the wireless charger in the front compartment for a Ford Expedition 2019.
 - The wireless charger is at an angle causing the phone to slide off the charger. This is a ledge that prevents the phone from moving off the charger.
- (I think this also applies to Ford Expedition models ranging from 2017-2020, but I do not have a car from every year so that has not been tested.)

Printing

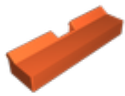

Nozzle 0.4-0.6

Support - Yes

Orientation - Upright. Print with the square base on the build plate and the angled ledge on the top. The support will be a thin slice propping up the angled piece. If you can print steep angles without support, it is possible to print without support.

Enjoy
