Scientifically accurate model of a sinosauropteryx. The model features high-poly feather and scale texturing along the model. I created two variants of the model, standing and posed. I recommend printing it at a finer layer height or with a resin printer. The files are pretty large, they may take a while to load.

I sculpted the model in Zbrush, and did some clean-up and scaling in Blender.

Timelapse on how I sculpted the sculpture:
