Tags: [ship](#) [space](#) [model](#) [class](#) [mars](#) [expanse](#) [corvette](#)
[mcrn](#) [rocinante](#) [gunship](#) [roci](#) [frigate](#)

This is a 3D printed model of a generic Corvette Class Light Frigate of the MCRN from the tv show the Expanse. This particular ship is named the Phobos.

The ship has several features:

Retractable PDCs

Openable Torpedo tubes with torpedos

Retractable Airlock cover

Extendable Docking Bridge

Openable Drone bay with a Drone

The model is a kit and requires no glue. The ship is in scale with my [Morrigan Class Patrol Destroyer](#) and my [Rocinante](#) model. For the assembly I highly recommend to watch the dedicated video about the project.
