Summary

This large ornament uses a standard 38mm dia. tealight LED candle to light it from within.

Tags: [retro](#) [vintage](#) [ornament](#) [christmasornament](#)
[christmasdecoration](#)

This large ornament or tabletop decoration (~5" diameter) uses a standard tealight LED candle (38mm diameter) to light it from within. If you have a tealight of a different size, I would scale the model to adjust to it's diameter.

Print in place with no supports.*

I've been using Cura standard settings with these changes

walls: inside to outside

8% gyroid infill

no supports (*you could add tree supports for the top of the smoke if you wanted it cleaner)

6mm brim

11/27 - Updated Model to fix issues with the smoke and the deer antlers.

12/4 - Updated Model to version 3 - redesigned cabin.

12/5 -Updated to fix base and chimney/smoke issues. Sorry for all the issues and Thank you for all the feedback (I only have one printer to print it on).
