Simple two part mount, only needs a cheap strap for a Quest1/2

2x 35mm M3 screw + nut

Quest 2 knuckle controller strap: (Does not have to be the one in the link, others with the same mounting points should work exactly the same)

Print with supports everywhere.

I always use two small stripes of cloth tape or electrical tape on both halves of the prints, inwards of the controller molds to give the controller a better grip and also dont cause any scratches.
