I LOVED the length of the Dean & Beans sock blockers, so I wanted to make an extension for an existing design.

My initial prints suffered from elephant foot, so you may need to file as well. They are snug enough to be persuaded with a rubber mallet. I secured mine with UV resin, just to make sure.

I modified the height of all of the pieces so they are uniform. My model is not perfectly straight, but it does the job when I am blocking freshly washed handknit socks.
