Summary

Oil funnel for a Honda CRV 2016.

Tags: [funnel](#) [vented](#) [ventedfunnel](#) [car](#) [oil](#)

My car has a very small space under the oil cap opening. Regular funnels did not seat straight without holding.

The lower diameter of the funnel is 30mm which fits perfectly. The walls are 1.2mm which allows for both 0.4 and 0.6 nozzles.

Print with PLA or PETG (best) at 0.2mm resolution.
