This is a simple print for mounting your bike light, or anything that fits the 20mm width, to material. Works like a button, and is fairly easy to install with a needle and thread. I found using a pair of pliers to push the needle through the canvas worked like a charm.

I designed it for the Planet Bike SuperFlash rear bike light, but I've included the FreeCAD file in case you need to modify it to fit yours.

### Print Instructions

Prints vertically with no support
