[Toys & Games](#) > [Outdoor Toys](#)

Action camera compatible mounts that attach to the barrel of a Nerf Rival Nemesis MXVII-10K. Use to mount camera, laser pointer, or other accessories.

M5 mounting screws.

You will probably need a ball-end allen wrench to tighten the 4x mount on barrel.

Note: The Rival in the picture has been modified. The useless decoration above the barrel has been removed to create more free space for mounting accessories.

Attribution: The awesome Pi Camera case in the photograph is this one:
