Thing <https://www.thingiverse.com/thing:3294137> from user mrath mounts a JeVois camera to a plate that provides a M4 20x24mm triangular mounting pattern. It was the inspiration for the mounting pattern used by these mounts.

This is a series of adapters that can convert things using a M4 20x24mm triangular mounting pattern to other types of mounts such as GoPro compatible and 1/4-20 tripod mounts in various orientations.

Print Settings

Printer Brand:

Prusa

Printer:

i3 MK2S
