Summary

This is a GoPro adapter for the JeVois camera. It was designed to be used with...

[Gadgets](#) > [Photo & Video](#)

This is a GoPro adapter for the JeVois camera.

It was designed to be used with <https://www.printables.com/model/326547-gopro-compatible-mount-for-v-slot-20x20mm-extrusion> to mount the camera to 20x20mm V-Slot extrusion (the offset of the adapter allows the camera's USB cable to clear the extrusion).

It may also work with other GoPro compatible mounts provided there is clearance for the camera's USB cable.

It can also provide some strain relief on the USB cable when used with a zip-tie and the provided spacer.

I have also included a mount for a 60mm LED ring that slides on to the adapter. It was designed for easy on/off and does not include any retention features, but could be glued on if desired.
