updated 27. 11. 2022 | published 27. 11. 2022

### Summary

The original snorlax (flowalistik) does look low-poly when printed but actually has > 229k faces. This has 244 faces

[Art & Design](#) > [Sculptures](#)

I like the look of this model so decided to download and play with it - but although it looked low poly, it wasn't. So before I messed around with it and really simplified the geometry.

This is not my design - I wanted a much lighter poly version Flowalisttik's model
