A 3D printable microphone!

Inspired by the Hoborec recording tutorial: "DIY Ribbon Microphone, How I made mine"

We decided to use his mechanism and design our own microphone around it.

It works like a charm and each build has its unique properties.

\*note: you have to print 2 ribbon holders to hold the aluminum foil.

Enjoy!

## Print Settings

**Printer Brand:**

SeeMeCNC

**Printer:**

Rostock MAX v3
