A small christmas ornament that i made a while back and now i have the perfect reason to upload it: The **2022 Holiday Decorations Contest**

**You need:** A 3d-printer (duh) and some superglue to put the star together and to attach the hanger.

**Note:** When printing you might wanna use a bit of glue stick to make sure that the points of the star prints properly but maybe its just me who needs to tweak some settings. Oh and i also print the whole thing at **50% size** which it is also set to in the 3mf file.

# Model files

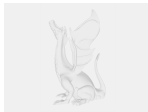

## christmasstar.stl

☐ Print 2 of this file at 50% size

## christmasstarhanger.stl

☐ Print at 50% size
