Designed this to be CNC'd. I have a case that fits the TS80 but it never really fit the TS100 well. I have seen online a nice wooden case for the TS100 but its out of stock everywhere and has been for as long as I've known about the TS100. I took it upon myself to make one. I was able to match overall dimensions of the TS80 case and fit more in it.

Magnets are 6mm dia x 3mm thick, QTY 5
