Summary

basic trash can with a sliding mechanism for ease of use

[3D Printers](#) > [Accessories](#)

Basic trash can that can slide out easily

Very easy to print:

- print the bin mounts on their sides (use high infill if you want to). There is a non sliding mount if you prefer

- print the bin in vase mode (you can stop the print when the bin is a suitable size for you)

Assembly:

- use a M6 screw for the wall mount

- use a 2.9Xmax9.5mm screw to attache the bin on the second mount

If you have questions or like the design leave a comment
