### Summary

This 2-in-1 tool combines a shotgun tool and a doob-toob. The toob handle also provides leverage for an easier puncture!

Printable with only build-plate supports. The tube will bridge, just thread the cap in and out a few times to break it in.

There is a hole in the top of the cap you can put a string through for either a wrist-band or to add to your keychain.

I used PLA, 0.15mm layers. Print time: 3hours

Happy Printing!
