The "Kartenbox" (in English "card box") is a little box with a lid for putting playing cards in it. The inner measures are 65 x 90 x 50 mm (width x height x depth), so it may fit for the most common playing cards out there. There are two little noses on the box, snapping into two holes in the lid, so the lid can hold by these.

I designed two 3D models (seperatly for the box and the lid) in Shapr3D, spliced them with PrusaSlicer and let them print with my Prusa i3 Mk3. Supports are not necessary for both models.
