Summary

A cute little bell that can be functionally printed as one model, works even at 50% scale!

[supportfree](#)

This is a small sleigh bell that can be printed in place, it is resizable and even works at smaller scales like 50%.

The loop at the top has been reinforced and should not break as it did in my photos.

Looks great when printed with gold or other metallic silk filaments.

Print Instructions:

Infill: 10%

Layers: 0.2 (others work fine)

No Supports

No Rafts/Brims/Skirts

Please note, this bell does not make a nice sound, there is no ding I can do about that.
