Summary

This creates holders for all your Lego Brick Separators and optionally fills the plate with studs.

[Hobby & Makers](#) > [Organizers](#)

Tags: [openscad](#) [legocompatible](#) [openscadcustomizer](#) [gridfinity](#) [legobrickseparator](#)

This parametric model uses gridfinity-rebuilt-openscad as the base for a holder for your mxn array of Lego Brick Separators. It works equally well with the orange and teal separators in any orientation, and presumably green too. At the request of [u/MyOther_UN_is_Clever/](#) the available plate is optionally covered in studs.

unionRound by Torleif Ceder is used and provided for the fillet

Drop both the separator file and unionRound in the same folder as your gridfinity-rebuilt-openscad checkout to build.
