updated 7. 12. 2022 | published 7. 12. 2022

Summary

A simple frame + left/right grips

[Gadgets](#) > [Computers](#)

Tags: [2](#) [max](#) [win](#) [gpd](#) [gpdwin](#)

Print vertically for best strength.

Rails might be too loose or too tight depending on 3d printer settings, use a hammer and/or glue if needed. :)

Settings I used:

0.20mm layer height

15% infill

Support for critical overhangs

Filament: Light Blue PLA

Printer: Bambu Lab X1 Carbon

Model files

win-max-2-grip-handle-left.3mf

win-max-2-grip-handle-right.3mf

win-max-2-grip-frame_revision-2.3mf
