### Summary

This is a stand for the E3D buggy that spins with some gears in the bottom.

Tags: [stand](#) [rotate](#)

This is a stand for an E3D buggy. It spins with some gears in the base. I used a gear from tinker cad in this model. I don't know how to credit them due to them not uploading it or anything in any other way than being in the program. This is my first model I have ever published, so if I did anything wrong, could you please let me know. Also the taller points go on the back of the buggy.
