Summary

Compared to the original, this hanger sets the coatrack 5cm back. This was to center the coat hangers in my closet.

My closet is tiny. The Rubbermaid wirerack doesn't place the coat hanger rod in the center of the closet space and was making it difficult to close the closet door. This hanger shifts the rod around 5cm back.

I've had it in use for over 2 years now and it has been working fine. This isn't a solid infill but I did use three layers of 0.6mm Nozzle shell to get a decent strength out of PETG.
