

Monster or alien eyes

Dilem

updated 23. 12. 2022 | published 23. 12. 2022

Summary

A monster eye sculpture to stick on inanimate objects to give them some character. Great alternative for googly eyes.

Our coffee pot at work was in dire need of some eyes, in the past i gave them googly eyes this one deserved some more character.

So i got to work on some wacky eyes to make him stand out as the superior pot in the office.

This is what i came up with. Duplicated and mirrored one in the slicer, printed, some double sided tape and now he stands and holds watch over my colleagues.

At 0.1 layer height it prints perfectly without supports. Eyeballs are painted.

I look forward to seeing what you attach them to.

Please check out my profile for other sculptures and designs.
