After trying 50+ filament clips which all had issues, I present to you - the one and only awesome filament clip:

- Works well with both thick and thin spools (see photos)
- Long and flat back side guarantees stability while protruding minimally (great if stacking spools horizontally)
- Filament holder part is tight but easy to get filament in and out
- Angled front makes it easy to get the clip on and off spools
- Rounded edges protect your fingers and filament bags from cuts

Supports 1.75 mm filament only.

For best results print in PETG.
