---

The original had a bearing divider that was too wide and didn't fit between the bearing for the AMSv1.

This remix reduces the bearing divider and includes additional bearing blocks for the left and right sides.

### Print Instructions

Clone the middle bearing block twice, for a total of 3 middle bearing blocks.

Prints shown in the images were done with the Extra Draft profile, using a 0.4 nozzle, but feel free to use a different profile if you want better quality.
