Keep those leggy blighters looking sharp! This is a very simple tripod plant support with a 100mm internal diameter which gives support up to 90mm above the pot (with enough of the legs still in the soil to be stable). It is a quick PETG print with legs that can be printed on their side, flat face down, so no supports required. The legs should be a snug push fit, no glue required. Gcode will print you one support set (1x top ring + 3x legs) in PETG.
