A simple insert for Iberian Gauge

You need 5 Company boxes + 6 Player boxes, one for priority token and round marker, 5 for all player color.

The player boxes are a little bigger than they should but it is to fit the box.

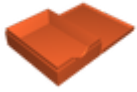

Also the company box meant to be using during the play as the treasury for the company.

I am not an expert but the code is here <https://github.com/fzerorubigd/bg-insert>

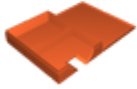

You need to have OpenSCAD installed to rebuild it
