This is a 4mm spacer that is placed inside the body of a stock Traxxas TRX-4 GTS shock. I needed to limit my travel on these shocks in my 3DSETS Bamboo 4x4. Stock length for these shocks are 90mm so with the spacers they are roughly 86mm. They fit a little loose but appear to be working well.

Update

V2 now fits more snug to the shaft and have added 4mm and 6mm
