Tags: [vase](#) [fun](#) [vasemode](#) [easyprint](#) [leaf](#)

little bit of fun this is weed vase I made this for someone who made a lovely version of one of my vases with a hemp filament so I have made a weed vase for them to try in the same filament. I hope they and you like it.

(disclaimer no marijuana was used or hurt in the making of this vase) :)

and as always happy printing

easy to print in vase mode you might want to use a brim as very small at the bottom. 4 hours at 75% 6 hours at 100% scale. printed with 0.4 nozzle at 0.15 layer heights.
