Summary

As a Startrek fan I always wanted to have my own Starfleet insignia and as a 3D designer, I could recreate them easily.

[captainkirk](#) [jjabrams](#)

As a Startrek fan, I always wanted to have my own Starfleet insignia and as a 3D designer, I could recreate them easily.

Those are the insignia from the Kelvin alternate timeline used on the JJprise and USS Kelvin.

Command, Operation and science version available

I used a neodymium magnet on the back to be able to wear them.

Size of the magnet used is 20-10-02 on both the badge and attachment part.

Show me your prints and pictures of you wearing them :)
