Summary

Remixed filament shelf system to fit my needs

[Hobby & Makers](#) > [Organizers](#)

Tags: [shelf](#) [filament](#) [bracket](#)

This is a remix of a filament shelf system by [xdcmx](#).

I extended the shelf brackets bottom part and moved one screw hole for easier reachability. They are also the perfect height to fit a spool if you want to stack them.

Diameter for wooden stick hole is now 20mm. Recommended distance between each bracket is 90cm. Otherwise the stick will bend a lot and perhaps break.

This remix is based on

Filament Spool and Shelf System
