Playful advent calendar for counting days until Christmas.

Models are designed for changing colors by layer. I really **recommending brim** for ruler. It's also small test of your **first layer**. For me it was great time to tune perfect first layer. :D

Another my tip is using layer height modification for ruler from **0 to 10** use **0.3 mm** and the rest **0.15** layer height or smaller.

Merry Christmas and Happy printing!

I really appreciate this great community and this is why I made base for remixing of the bouncing figure. Can't wait to see your makes and remixes!
