updated 2. 12. 2022 | published 2. 12. 2022

Summary

This is an Open Source version of a keyboard that is made to be used by a single hand to play games.

Tags: [gaming](#) [gamer](#) [opensource](#) [macro](#) [keypad](#)
[macropad](#) [ergonomic](#) [singlehanded](#) [keyboard](#)

I saw the need for something like that when I wanted to print one but couldn't find a decent stl to download, then I decided to make it myself.

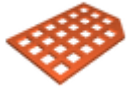

The keycaps that were used in the picture are available [HERE](#).

Printed on my Ender 2 Pro with 2mm layer height.
