I wanted somewhere to store my cotton pads for wiping the print bed between prints. Nothing really met my need so I modeled this.

I like that it mounts on the side of the enclosure and doesn't get in the way. It helps me keep my area tidy.

Print instructions

I print this on its base, I use a modifier block to add supports to the base only (to help with the cutout. Printed well and came out right first time.

I used a 0.2mm layer height
I printer in PETG

I think it would be difficult to get this print wrong
