Christmas gift box intended for wrapping Christmas gifts. It's very simple. The Christmas gift box, when folded, is 7.5 cm high and 4 cm wide. Before printing, see the printing instructions.

Printing instructions

The orientation of the print should be placed flat on the mat. It is intended for printing without supports. We print with a layer height of 0.2 cm and a nozzle of 0.4 cm and with 100% even filling and 2 perimeters. In the picture I used gold and white filament. After printing, it is necessary to glue the two sides of the Christmas gift box with instant glue.
