Welcome to Stonehenge!

This model was created by [Artemio García](#) , available also in MMU version.

Stonehenge is a prehistoric monument in Wiltshire, **England**. It consists of a ring of standing stones, with each standing stone around 13 feet (4.0 m) high, seven feet (2.1 m) wide and weighing around 25 tons. The stones are set within earthworks in the middle of the most dense complex of

Neolithic and **Bronze Age** monuments in England, including several hundred burial mounds. Archaeologists believe it was constructed from **3000 BC to 2000 BC**.

One of the most famous landmarks in the United Kingdom, Stonehenge is regarded as a British cultural icon. It has been a legally protected Scheduled Ancient Monument since 1882. The site and its surroundings were added to UNESCO's list of World Heritage Sites in 1986 ([from Wikipedia](#)).

MiniWorld 3D is happy to bring this historical model to life as a homage to all the people of the UK. This model was created from scratch by hand and brain in parametric software to ensure printability, using photographs and blueprints to create a beautiful and stylized version of your favorite landmarks. Please give credit, it's all about spreading culture!

Printing Tips

Suggested parameters:

For better details, print slow, such as 15 or 20mm/s for outer perimeters.
Fine-tune retraction to avoid stringing.

Perimeters: 2

Top layers: 3

Infill: as low as 12%

No supports needed, this has been optimized to eliminate all overhangs.
