Simple camera / webcam mount for Ender 3 S1 / S1 Pro. This uses standard tripod 1⁄4-20 bolt mount. Insert a bolt through bottom of model, glue in place if desired. I used a 1⁄2" long bolt, use a longer bolt for higher camera mounting. Thread on a camera or webcam for streaming or time lapse purposes. Remove and reuse the two corner screws on your printer to mount this print. I used this in combination with this C270 webcam mount- https://www.printables.com/model/209335-logitech-c270-tripod-mount
