Christmas tree with stars with separated LED tea light holder trunk.

2 stl are provided for the trees : one for vase mode and one for normal mode printing.

The vase mode is easier and faster to print (on the right on the pictures - printed with 0.4mm nozzle and 0.6 perimeters thickness) but the render of the stars with the tea light is a bit less beautiful than the normal printed one (on the left on the pictures) .

Regarding the trunk, I provided a simple model which can be printed with "fuzzy skin" for a nice effect and also a model with a spiral groove.

Edit : Other model available here => <https://www.printables.com/fr/model/671067-christmas-tree-tea-light>
