The **TerraPi Xtreme DUO** is an open Raspberry Pi NAS case, featuring **two HDD 3.5" slots**.

A set of USB3 to SATA external power adapters are required to connect the drives to the Pi. You can buy those from your local market, to ensure that voltage requirements and safety standards are met. Make sure that they will support the capacity of your 3,5" HDD drives!

The TerraPi DUO can also be used as a DAS (Direct Attached Storage) Case for housing the 2 HDD drives.

A detailed BOM is included in the PDF file. Let us know if you cannot source the parts.

You can find step-by-step assembly [instructions here](#)

Please tag your print in social media #terrapi and show us your rig! We would love to see what you made with our design!
