Merry Christmas everybody! Apologies for taking so long to bring this one out, it has been a slightly busier month than usual.

Riding on a similar theme to my popular Gingerbread House kit I bring you Santa Claus' sleigh, which of course could not be complete without a reindeer or eight! These are quite small kits and print super quick so be sure to really **churn** 'em out, fitting easily inside Christmas cards! They can either stand freely or be hung up, with loops to rope them together.

My Gingerbread House kit card:

Update 1: Fixed artefact on Ti Sleigh models.

Update 2: Added '2Side' variant of the Reindeer with the icing pattern on both sides. He is a little bit festively plump!

Included is the standard fit, same as other kits, but also a tighter (**labelled 'Ti_'**) variant as I know some of you might find the standard fit too loose!

You can make it EVEN TIGHTER by increasing the Z-scale by 15%.

For those uninterested in the card format, there are frameless variants included, alongside the individual part files!

Included is a NEW fast printing fit tester for both Regular and Tight variants!

Print at **0.2mm layer height**, there really is no benefit from printing at a higher resolution and it could affect the fit.

The model parts are 1.8mm high, which is not divisible by 0.16 for example!

Be sure to print with **100% infill** for it to hang straight as the weight distribution can be sensitive!

Makes greatly appreciated, always glad to see them! Happy Printing!

Interested in selling?

All files are marked as non-commercial along with any remixes created from them.

If you are interested in selling physical prints of my models anywhere, be it online or offline, you can obtain a **sales license** when subscribed to **Tier 3 of my Ko-Fi memberships!**
