This is an easy-to-print, modern Christmas tree. Looks really well as a winter decoration. It can be printed in **vase mode** as well as standard mode.

Recommended print settings

- vase mode: yes
- bottom solid layers: 7
- extrusion width: 1 mm

Printing it with 1 mm extrusion width makes it solid enough.

This model prints nicely with **fuzzy skin** feature on it. It adds additional strength and hardness to the walls.

When printing in standard mode, seam position should be set to **aligned**.

The tip of the tree should be **printed slowly** to avoid unwanted deformations.
