It's a pastry cutter. It's very simple. Height is 5.2 cm, width 6.2 cm and thickness 1 cm. I designed the cutter with a stamp that is suitable for fondant or butter pastry. Each can be printed separately or together to save space on the mat. Before printing, see the printing instructions. The model cannot be proportionally reduced or enlarged.

Printing instructions

The orientation of the print should be placed on the bottom surface sideways. It is intended for printing without supports. We print with layer 0.3 and nozzle 0.4 and with 100% filling and 2 perimeters. I used white filament in the picture.
